## The GeoStudio - A Space For Creatives

**IF** you are a creative you seek meaningful activity, spiritual connection and opportunities to express your true essence. If you are a creative *and* living your purpose you are already in tune with that essence. To consistently stay in tune with that essence you require a space to practice your art or refine your skill or simply reflect on your purpose.

Life coaches will tell you, mentors will tell you and your intuition already tells you, that you need a *specific* space that serves to nurture your spirit. And that space needs to be accessible, quiet and aesthetically appealing.

We have work spaces, we have play spaces, spaces to cook, eat and of course sleep spaces. We should also acknowledge that we need spaces for self-care.

While we can climb that mountain to that place of serenity or go to that healing place by the ocean or seek out that secluded monastery - we know this is not possible on a daily basis. If you want to truly deepen your practice or refine your craft you need something here and now. Something you can call your own.

A GeoStudio is a tiny, heat-able studio that can be your own personal retreat. It's a place that will help you become the you're striving to be.

So whatever your creative practice is; yoga, tai chi, dance, meditation, music, art or any of the numerous manifestations of finding yourself, it can be done in a GeoStudio.
